

Get Your Clinic Ready for Coronavirus Disease 2019 (COVID-19)

From CDC

Get ready! Steps you take to prepare your clinic for flu also can help protect your patients and healthcare workers from COVID-19.

Train and prepare your staff now

- Ensure that clinical staff know the right ways to put on, use, and take off PPE safely.
- Recognize the symptoms—fever, cough, shortness of breath.
- Implement procedures to quickly triage and separate sick patients.
- Emphasize hand hygiene and cough etiquette for everyone.
- Ask staff to stay home if they are sick.
- Send workers home if symptoms develop at work.

Before Patients Arrive

- Prepare the clinic.
 - Know which of your patients are at higher risk of adverse outcomes from COVID-19.
 - Consider and plan for providing more telemedicine appointments.
 - Know how to contact your health department.
 - Stay connected with your health department to know about COVID-19 in your community. Step up precautions when the virus is spreading in your community.
 - Assess and restock supplies now and on a regular schedule
- Communicate with patients.
 - Ask patients about symptoms during reminder calls.
 - Consider rescheduling non-urgent appointments.
 - Post signs at entrances and in waiting areas about prevention actions.
- Prepare the waiting area and patient rooms.
 - Provide supplies—tissues, alcohol-based hand rub, soap at sinks, and trash cans.

- Place chairs 3–6 feet apart, when possible. Use barriers (like screens), if possible.
- If your office has toys, reading materials, or other communal objects, remove them or clean them regularly.

When Patients Arrive

- Place staff at the entrance to ask patients about their symptoms.
 - Provide symptomatic patients with tissues or facemasks to cover mouth and nose.
 - Limit non-patient visitors.
- Separate sick patients with symptoms.
 - Allow patients to wait outside or in the car if they are medically able.
 - Create separate spaces in waiting areas for sick and well patients.
 - Place sick patients in a private room as quickly as possible.

After Patients are Assessed

- Provide at-home care instructions to patients with respiratory symptoms. Consider telehealth options for follow up.
- Notify your health department of patients with COVID-19 symptoms.
- After patients leave, clean frequently touched surfaces using EPA-registered disinfectants—counters, beds, seating.
